We are offering our customers a safe and powerful option for mitigating the spread of COVID-19 and other airborne flu viruses and bacteria.

Through the use of ultraviolet technology, combined with cleaning using disinfectants approved by the Centers for Disease Control (CDC), GForce can clean your work environment with minimally invasive and technologically sound processes that will reduce the risk of virus exposure.

- Eliminate bacteria, viruses and odors at a high rate
- Can be used in occupied spaces while remaining safe for anyone in the office without ozone.
- Specially formulated chemicals approved by CDC quickly wipe out a broad spectrum of bacteria, viruses, such as COVID-19
- With UVC lighting, blowers will continuously circulate treated air
